

## GETTING THE BENEFITS OF PLANVIEW PRISMS® E-LEARNING FOR YOUR ORGANIZATION

Planview PRISMS® E-Learning allows your organization to speed adoption and increase the value of your Planview investment. PRISMS E-Learning includes:

- On-demand training modules: formal, scripted courses and informal materials such as recorded online training, presentations, and webcasts
- PRISMS Live: instructor-led concept and methodology courses on best practices and project and resource management with PMP® certified instructors
- Ask an Expert: Informal, instructor-led classes provide a variety of topics and at your convenience with direct access to experts at Planview

Cost-effective and flexible, PRISMS E-Learning uses a role-based approach that increases productivity and retention by delivering the right training at the right time to the right people. Users spend their time wisely, in training that is relevant and targeted to their needs, so they learn exactly what they need to know when they are ready to absorb and use it. Sessions can be even be customized with your organization's data and processes, increasing the impact and relevance of the learning experience, and increasing users' understanding and retention of new information.

PRISMS E-Learning is accessed through the dynamic PlanviewPRISMS.com portal, which also offers scheduling, assessments, and dashboarding capabilities. This enables you to deploy Planview Enterprise training globally to thousands of employees in multiple time zones with varying priorities and schedules.

And buying Planview PRISMS E-Learning is equally flexible – get education bundled in with one of our Planview RPM Solutions, or select a subscription to the entire library – it's up to you.

Let's take a look at three typical use cases of Planview PRISMS E-Learning and the benefits.

### Use Case 1: Leveraging PRISMS E-Learning in Planview RPM Solutions *Deploying Planview Enterprise to a Business Unit*

An enterprise is implementing Planview Enterprise for the first time and is deploying it first to one centrally located business unit, which includes 250 users. The company has bought a Planview RPM Solution – a fixed-price package which integrates Planview Enterprise software, best practices, value-added services, SaaS infrastructure as well as PRISMS E-Learning – to rapidly deliver the benefits of robust portfolio management capabilities.

Leveraging the PRISMS E-Learning offerings within the RPM Solution, the company's IT training manager uses PlanviewPRISMS.com as the administrative portal for all training. He first ensures that all users are signed up for the introductory Planview Enterprise on-demand classes, to familiarize them with the software and ensure their instructor-led classes will be effective. Then the instructor-led and additional on-demand classes follow, with users "graduating" from one session and track to the next via scored self-assessments. Meanwhile, the IT training manager tracks and reports on E-Learning usage and user improvements using the comprehensive roll-up dashboard with meaningful metrics in PlanviewPRISMS.com.

*Benefit: By virtue of their Planview PRISMS training, users of the business unit are well prepared to get the most value out of the company's portfolio management investment, smoothing the road for the full Planview Enterprise deployment.*

### Planview PRISMS

The Planview PRISMS product line facilitates the adoption, knowledge, design, continuous process improvement, and rollout of Planview Enterprise. PRISMS Best Practices optimizes business management and performance with an adaptive environment of proven best practices. PRISMS Best Practices Knowledge Base, Process Tools, and Live Process Expertise enables you to deliver process maturity improvements and realize benefits faster. And the PRISMS Social Learning Platform offer a comprehensive approach to professional networking and collaboration promoting promotes communication among groups and colleagues to accelerate adoption.

Taken together, the Planview PRISMS offerings help you to efficiently and effectively implement your portfolio management solution and achieve rapid ROI on your Planview investment.

Developed by training experts, our programs are targeted to increase performance, helping users:

- Learn independently, anytime, anywhere, and at their own pace – and reduce the amount of "casual" training by administrators and project managers
- Experience classes in their preferred learning styles, with training designed for visual, kinesthetic, and auditory learners
- Understand what they need to know by providing a range of experience levels and class types for different topics

## Use Case 2: Selecting the Planview PRISMS E-Learning Library

### *Migrating to a New Version of Planview Enterprise*

A large, multi-national company, with 5,000 employees in offices across the world is moving to the next version of Planview Enterprise and needs to get its global user base trained on the new features and functionality. The training manager is facing challenges of timing, availability, accessibility, applicability, and cost of enterprise training. Travel costs and cost per student are too high for thousands of employees, especially if they need to attend multiple classes. So, to maximize the value of its investment, the company has selected a subscription to the entire PRISMS E-Learning library.

As is the case with every new Planview Enterprise rollout, there are many new class offerings available, both on-demand and instructor-led. Many of the pre-recorded classes feature videos and step-by-step demonstrations, which users find particularly helpful. Additional PRISMS Live sessions are available to provide concept and methodology education around best practices and project and resource management, perfect for employees at every level of the organization. The company's thousands of users register for and take the special track of migration classes and courses specific to the new release; many also choose to freshen up skills on portfolio management techniques, while others leverage more advanced classes to go to the next level.

*Benefit: The full Planview PRISMS E-Learning library, with its structured framework, relevant statistics, and easy access to the broad and deep knowledge base of Planview expertise, gets the company's users trained quickly and effectively on the new release's features, and enables the company to see a fast return on its Planview Enterprise migration investment.*

## Use Case 3: Choosing Customized Planview PRISMS E-Learning Modules

### *Adding New Planview Enterprise Users*

A company with several thousand Planview Enterprise users across the globe continually deals with the situation of bringing occasional new users up to speed on the system. Traditionally, the Planview Enterprise administrator provided this training, but as his bandwidth thinned, this became less and less feasible. Additionally, because different people learn in different ways, what was needed were classes crafted by true training experts.

To address the challenge, the company purchases a subscription to the PRISMS E-Learning library, along with customized E-Learning modules, which enhances PRISMS E-Learning sessions with company-specific processes and sample data, ensuring improved understanding and retention of information by those attending the classes.

*Benefit: New users learn what they need, when they need it, cost-effectively and quickly, bringing them on board quickly and making them effective team players fast. The organization as a whole sees an added benefit by increasing the productivity of the Planview Enterprise administrator whose "casual trainer" role is eliminated.*
