

PLANVIEW ENTERPRISE ON DEMAND

The Planview® SaaS Offering Provides Fast Implementation for Comprehensive Portfolio Management and Quick Time to Value

When facing increasing expectations and constrained resources, business leaders have to find more innovative and flexible ways to enable productivity. Planview Enterprise On Demand, the Software-as-a-Service (SaaS) offering for portfolio management, offers the choice.

Leverage the comprehensive portfolio management capabilities of Planview Enterprise without dedicating time and resources to internal application infrastructure configuration and management. With Planview Enterprise On Demand, get the robust features of an enterprise-scale deployment, with fast implementation and short time to value.

The ‘What You Need, When You Need it Solution’

No matter the organization’s size or process maturity level, stakeholders will realize portfolio management benefits quickly, to drive maximum value from projects, services, and products with negligible impact on infrastructure and budget.

Planview’s scalable solution grows with the organization’s needs, so management can take full advantage of the market’s most comprehensive resource, demand, and financial management tools over time. Organization will realize:

- Accelerated time to value. Organization can quickly and easily access the functionality of Planview Enterprise, enabling impact on business outcomes faster.
- Reduced costs. The SaaS model greatly minimizes up-front and ongoing management costs, reducing multi-site hardware, software, and support expenses.
- Scalable configuration. As usage increases, system resources are added as needed without a large, up-front investment.
- Organizational flexibility. Gain flexibility to shift budgets and resources from IT service maintenance to higher-priority initiatives.

Planview Enterprise On Demand Features

Planview is recognized for its quality and commitment to customer satisfaction. Planview Enterprise On Demand delivers on that commitment with features that include:

- Around-the-clock availability. Users just need a Web browser to access all the benefits of Planview Enterprise. Access to Planview Enterprise On Demand is available 24/7, and the cloud-hosted solution is maintained with continuous monitoring to ensure consistent availability.
- Deployment flexibility to meet business needs. Start with Planview Enterprise On Demand and then later convert to an on-premise installation. Or start on-premises and then move to Planview Enterprise On Demand.
- Expert service and support. Technical support is delivered via the expert Planview hosting operations, and includes systems management, scheduled backups, database optimization, and seamless upgrades and patches, with data archive and recovery services.
- Complete customer control over upgrade timing. One of the unique benefits of the cloud-hosted infrastructure is it allows the customer to specify when to do upgrades to newer versions of Planview Enterprise On Demand. Customers can try out new versions of Planview Enterprise On Demand in a test environment before switching over production.
- State-of-the-art equipment and partners. Planview Enterprise On Demand features an advanced cloud-hosted infrastructure with high-end server hardware, database management software, firewall protection, data storage services, and malware protection. In addition, benefit from Planview’s relationship with world-class server and co-location partner SunGard for high reliability and performance.
- Secure solutions. Your data is vital, so Planview Enterprise On Demand provides the highest possible level of security for all users. SSL encryption guarantees data privacy, password protection, and the security of data. The cloud-hosted infrastructure allows each customer in a separate virtual environment to provide secure isolation of customer data.
- Competitive pricing. Planview offers competitive pricing with a simple model based on the total number of Planview users. The initial setup and monthly fees include everything you need to get started.

Planview Enterprise On Demand

Planview Enterprise® On Demand is the Software-as-a-Service (SaaS) offering of Planview Enterprise, the company’s market-leading portfolio management solution.

Planview Enterprise components include Enterprise Portfolio Management for linking strategy with execution, Product Portfolio Management for maximizing the market impact of products, Ideation Management for capturing the voice of the customer throughout products and services, Services Portfolio Management for managing the total cost of business service delivery, and Insight Analytics for accelerating informed business decisions. Planview Enterprise is available both in an on-premises and SaaS offering, for optimal deployment flexibility.

Planview Enterprise On Demand delivers the full portfolio management capabilities for Planview Enterprise via the flexible SaaS delivery model.
