

PLANVIEW OPENSUITE

Out-of-the-Box Interoperability between Planview Enterprise and the Systems You Rely on Everyday

The benefits of integrating Planview's portfolio management applications with the IT and business systems you use daily are clear: you get a one system of record for increasing enterprise-wide visibility into the status of projects, programs, and products, improved collaboration and communication among stakeholders, and alignment of the services and work with corporate financials and strategic plans.

Integrating applications with corporate systems is often easier said than done in the reality of heterogeneous environments. Replacing a familiar tool is not practical or desired, and homegrown integrations don't often scale with new versions of critical systems.

The solution? Planview OpenSuite, a family of offerings that provides out-of-the-box interoperability between the portfolio management capabilities of Planview Enterprise® with enterprise resource planning (ERP), application lifecycle management (ALM), information technology (IT), product lifecycle management (PLM) and other business systems you rely on every day.

Planview OpenSuite enables the vision of integrated management while being grounded in your reality of a heterogeneous application environment. Now, you can easily share data in disparate systems to make the most informed decisions while enabling those systems to do what they do best – manage application lifecycles and IT service delivery, control the product development lifecycle, and ease collaboration and productivity.

Planview OpenSuite provides interoperability with leading offerings including IBM® Rational® Team Concert, IBM Rational Focal Point®, Atlassian JIRA®, Rally® Software, Siemens® Teamcenter®, BMC® Software Business Service Management Suite, Collaboration Lifecycle Management solutions, and ERP systems like SAP® and Oracle®.

Planview OpenSuite

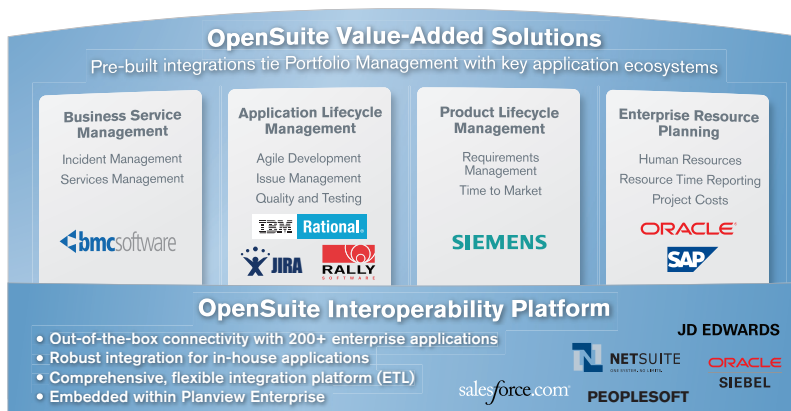

Planview® OpenSuite™ delivers out-of-the-box interoperability between the portfolio management benefits of Planview Enterprise® and the technology solutions you rely on every day. Now, you can easily share data in disparate systems to make the most informed decisions, while enabling those systems to do what they do best – manage IT service delivery, control the product development lifecycle, and ease collaboration and productivity.

Use Planview OpenSuite to:

- Easily integrate Planview portfolio management with your ERP, ALM, IT, PLM, and business management systems
- Leverage existing investments while improving productivity
- Increase transparency into project status
- Improve collaboration on projects, products, and programs
- Relate deliverables back to corporate financials and plans

PLANVIEW OPENSUITE

Planview OpenSuite integrates portfolio management with critical business and IT systems

“Application portfolio management is critical to understanding and managing the 40% to 80% of IT budgets devoted to maintaining and enhancing software.”

- Gartner Research

Dramatically reduce IT costs and improve infrastructure management by:

- Simplifying application infrastructure to comply with enterprise architecture requirements
- Eliminating redundant and low-value applications
- Accelerating portfolio evaluations during mergers and acquisitions
- Identifying and quantifying sourcing alternatives
- Instituting effective IT governance / portfolio management processes

Planview OpenSuite provides interoperability three ways:

1. The Planview OpenSuite Interoperability Platform

Embedded in Planview Enterprise, the Planview OpenSuite Interoperability Platform delivers out-of-the-box connectivity to 200+ enterprise applications and technologies, and enables custom integrations into homegrown systems. The rich integration capabilities included with the Planview OpenSuite Interoperability Platform provide the key boost to bringing integrations online quickly. The interoperability platform includes connectors for:

- Applications – Siebel CRM; Salesforce; Microsoft Great Plains and Dynamics; Peachtree; Sage; SAP
- Databases – Oracle; IBM DB2; Informix; MySQL; SQL Server, Access; Sybase ASE; Teradata
- Files – ASCII and Mac ASCII; Excel and Word; WordPerfect; Visual dBase; FoxPro; IBM Lotus; dBase
- Technology – Email; FTP; HTTP/S; HTML; Oracle AQ, BPEL; SGML; SOAP; XML, REST
- Legacy – COBOL; Binary; C-tree; QSAM; Tape Drive Sequential
- Retail – EDI; EDIFACT; TRADACOM
- Healthcare and Insurance – HL7; UB92-NSF; HCFA 1500-NSF, ACORD
- And many more

These integration connectors help you relate work, projects, and deliverables back to corporate planning, financials, and resource planning strategy, enabling you to offer greater transparency into spend while improving the enterprise’s ability to plan for and manage human capital, operations, and corporate services.

2. Portfolio-Driven Solutions

Planview OpenSuite offers off-the-shelf integrations between Planview Enterprise and leading enterprise systems, to help you get the maximum value from all your technology investments.

Application Lifecycle Management

Planview OpenSuite for JIRA

Integrate Planview Enterprise with Atlassian JIRA to empower product managers and developers to work more efficiently, using the applications that work best for their respective roles while communicating effectively to ensure maximum productivity and effective delivery of products and services.

Planview OpenSuite for IBM Rational

Planview provides the only off-the-shelf portfolio management integration into market-leading IBM Rational Team Concert and IBM Rational Focal Point solutions.

- **Planview OpenSuite for IBM Rational Team Concert** connects the output of operational planning processes to project execution by an agile software team to align development work with program priorities and enables seamless communication between the two programs.
- **Planview OpenSuite for IBM Rational Focal Point** integrates top priority proposals from IBM Focal Point into Planview Enterprise allowing portfolio and project managers to do supplementary optimization, including financial and resource planning.

Planview OpenSuite for Rally Software

Planview OpenSuite for Rally Software connects Planview PPM and Rally Agile ALM solutions to deliver a consolidated portfolio view in Planview Enterprise. Through the status and financial information exchanged, the total cost of all software development projects is made available in Planview Enterprise.

Business Service Management

Planview OpenSuite for BMC Remedy Service Desk

Get an efficient approach to handling service desk tickets. This integration to the BMC solution routes your service desk tickets automatically into Planview Enterprise for a true end-to-end approach to IT service management.

Product Lifecycle Management

Planview OpenSuite for Siemens Teamcenter PLM

Planview OpenSuite for Siemens Teamcenter PLM provides portfolio analysis in Planview Enterprise on schedules that reside in Teamcenter. Resources are synchronized between Teamcenter and Planview Enterprise. This facilitates capacity management, forecasting, better decision making, and optimization of the product portfolio.

Enterprise Resource Planning

ERP provides critical business insight into areas such as Finance, human capital management, operations, corporate services, and processes, while reducing costs and improving productivity.

Planview OpenSuite for SAP and Planview OpenSuite for Oracle

Import SAP and Oracle HR data into Planview Enterprise, eliminating the need to re-enter that personnel information. Share cost calculations from SAP and Oracle with Planview Enterprise, making it easy for project managers to keep projects on budget.

3. Standard Data Integrations

Custom Integrations into Your Key Applications

Use our collection of Web services and APIs to create custom integrations and perform data loads and specialized actions to move data in and out of Planview Enterprise and other systems, be they off-the-shelf or custom-developed. Make critical information more available, accessible, and relevant than ever for stakeholders across the enterprise!

Get the benefits of Planview OpenSuite!

Get and share the information that will drive smart decisions and effective planning across your department and the enterprise.
