

PLANVIEW PRISMS® BEST PRACTICES

An Adaptive Environment of Guidance and Automation for Improved Business Processes

Planview PRISMS Best Practices provides guidance on how to achieve operational excellence through a vast knowledge base of best practices, backed by thousands of process and procedural steps documented through online and on-site services, templates, and process maps.

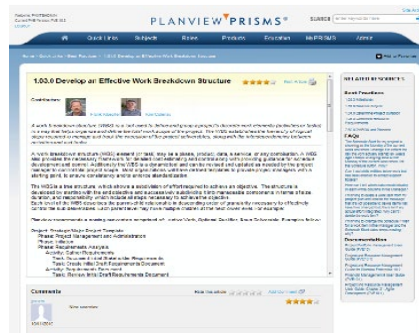

PRISMS Best Practices offers an array of business management techniques, honed from more than 20 years of experience with hundreds of Planview customers across many different industries and are specifically designed to address the challenges faced by knowledge worker environments. Tight integration between Planview Enterprise® and PRISMS Best Practices means that you can get deeper guidance to drive adoption with access to the Best Practices Knowledge Base, Process Tools, and Live Process Expertise.

Planview PRISMS Best Practices-Knowledge Base

PRISMS Best Practices Knowledge Base combines best practices with proven methods and techniques that enable change within the organization while driving adoption and usage of the Planview Enterprise software. Get access to whitepapers, publications, and a community of practitioners. Network with your peers and post questions, communicate ideas, concepts, and more. Users experience a cohesive and consistent approach that aligns to a unified set of concepts that complements Planview Enterprise functionality.

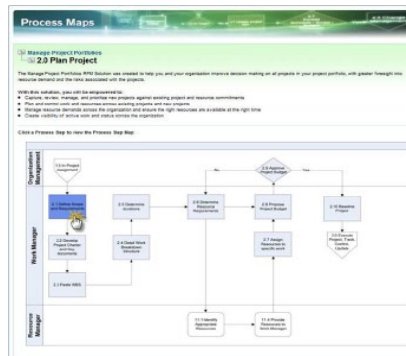

Included in PRISMS Best Practices- Knowledge Base:

- Industry Best Practices
- Planview Enterprise application Best Practices
- Whitepapers and publications
- Access to a community of practitioners

Planview PRISMS Best Practices-Process Tools

PRISMS Best Practices Process Tools include interactive process maps and templates in critical process areas, or groupings of business functions, providing templates for such areas as work breakdown structures, example documents, forms, dashboards, and process updates for the right role for each stage of the innovation lifecycle. The interactive process maps provide a framework that allows users to drill down and customize processes with a click of a button. These process-specific maps provide increasing levels of detail to help assess your business process maturity and to maximize the extensive functionality in Planview Enterprise. As an added benefit, we offer interactive process maps in Microsoft® Visio. Use them as a framework for process reconfiguration and adjustments and deliver process maturity improvements.

PRISMS Best Practices Process Tools provides high-level component maps – such as the adjacent strategic planning map – that define the structure and scope of business functions within each process area. Each component map contains four to eight major functional phases (components) such as define, plan, manage, and execution. Each component lists the major sub-functions that relate to specific process activities, such as define scope.

Planview PRISMS

The Planview PRISMS product line facilitates the adoption, knowledge, design, continuous process improvement, and rollout of Planview Enterprise. PRISMS Best Practices optimizes business management and performance with an adaptive environment of proven best practices. PRISMS Best Practices Knowledge Base, Process Tools, and Live Process Expertise enables you to deliver process maturity improvements and realize benefits faster. And the PRISMS Social Learning Platform is a comprehensive approach to professional networking and collaboration promoting communication among groups and colleagues to accelerate adoption.

Taken together, the Planview PRISMS offerings help you to efficiently and effectively implement your portfolio management solution and achieve rapid ROI on your Planview investment.

Included in PRISMS Best Practices Process Expertise

- Interactive PRISMS Live Classes
- Four hours SME process consultation services

Benefits of Using Planview PRISMS Best Practices

The unique structure of PRISMS Best Practices delivers not only the concepts, architecture, and design needed to foster process improvement, but also the automation and integration necessary to put those processes into action. Organizations can build process maturity with confidence and efficiency by leveraging the included process lifecycles and automated workflows, configuration examples, templates, dashboards, and other business intelligence components. PRISMS Best Practices offers a proven roadmap to process excellence unlike any other in today's marketplace. The results are a rapid return on your investment, a high level of adoption, and the flexibility and guidance to easily implement additional processes.

PRISMS Best Practices are available via PlanviewPRISMS.com. The interactive platform allows users to rate best practices and contribute to discussions about them with colleagues, and lets them drill into process maps to view associated content, like training opportunities and articles. This integration of elements delivers a cohesive approach that enables accelerated process maturity and investment ROI.
